

# SEVERE WEATHER PROTOCOL

This notice provides insight and relevant information to simplify communication during severe weather. With effective communication, we can restore power and overcome outages and damage from severe weather more effectively.

Working together and providing products to help restore power during severe weather is a primary focus for Foam Supplies, Inc. (FSI).

Inventory and orders are managed based on weather risk levels. "Storm Orders" take priority when necessary and we apply available assets to urgent situations. We are committed to working around the clock if necessary, to support efforts until an urgency has subsided.

FSI "readiness" mimics the Severe Weather Risk Categories.

# Emergency Contacts & Territory

“Foam Supplies monitors weather and utility outage reports and elevates readiness levels accordingly. Communication, both internally and externally occur as readiness levels change.”

## Dedicated Inventory

FSI maintains dedicated “Storm Emergency” inventory of BMK critical restoration products. The dedicated products are specifically set aside for utility needs during storm emergencies when immediate high volume material needs are anticipated. Additionally, when a major storm is imminent, we set aside regular inventory as potential storm material.

## Availability

Storm inventory is available on a first-come first-serve basis. However, to ensure that storm inventory ships to the area(s) in critical need, FSI reserves the right to determine when and where to make material available.

## 24/7 Manufacturing

Foam Supplies, Inc will dedicate production capability toward manufacturing storm orders during a major event. We will operate 24/7 as needed to manufacture products for emergency power restoration. Availability may depend on raw material supply chain.

## Expedited Shipping Available\*

\*Fees will apply.
